

## ACTIKEWL® GARMENT ACTIVATION & CARE GUIDE

ActiKewl® garments are engineered using advanced SAF™ (Super Absorbent Fibre) technology to deliver sustained evaporative cooling in high-temperature environments.

### **IMPORTANT: FIRST USE PREPARATION**

#### **Pre-Wash Requirement (Recommended)**

Machine wash at 40–50°C before first use.

Why this matters:

- Removes residual surface material from SAF™ fibres
- Improves comfort against the skin
- Optimises hydration and cooling performance
- Ensures best performance from first use

### **ACTIVATION INSTRUCTIONS**

1. Soak garment in water for 1–2 minutes
2. Gently squeeze out excess water
3. Do not wring aggressively
4. Wear immediately

### **CARE & MAINTENANCE**

- Hand wash or machine wash up to 60°C
- Avoid heavy detergents
- Air dry only
- Allow full drying between uses

### **IMPORTANT USAGE GUIDANCE**

Do not freeze – this may damage fibre structure.

Refrigeration optional – provides initial cooling only.
